

## White Melamine Particleboard

D & R Henderson Pty Limited is a wholly Australian owned company involved in the manufacture and distribution of wood panel products. The company has been in operation for 40 years, employs over 400 people and has offices, factories and warehouses in five states in Australia.

Our white melamine particleboard is manufactured under stringent conditions. Certification under the Joint Accreditation System of Australia and New Zealand (JAS-ANZ) ensures our particleboard products are of consistent quality and produced to the specification required by Australian Standards.

Henderson White Melamine Particleboard is available on either standard or moisture resistant substrate. Moisture resistant particleboard uses a special resin that repels water making it ideal for kitchens and cabinet installations. The particleboard is pressed with durable and robust melamine impregnated paper.

We manage our activities within the constraints of a responsible commitment to the community and the environment. The timber used is sourced from Australian plantation pine forests – a renewable resource. Our wood waste recycling plant recycles timber waste into our manufacturing process.

Our ongoing commitment to quality means we are constantly striving to exceed our customers' expectations in terms of product quality and service delivery.
